

PERSONAL AUDIO LOGGER

*Local Line Interface and
Personal Logging Software*

Record your important calls! Get crystal-clear audio quality. Keep organized records of your inbound and outbound calls. Do it all without any special hardware!

Installation is simple: Just connect the line adapter between your phone handset and PC sound card.

A powerful reverse-indexing feature lets you automatically determine the name and address of callers. Use it to build customer files and analyze agent performance.

Caller-ID decoding helps you track incoming calls, and DTMF decoding keeps a record of all outbound numbers dialed.

You can easily attach note files to calls while they're recording. Click a single button to email a call instantly.

Calls are time-stamped for precise recall. Digital quality gives you crystal clear audio - you can hear a pin drop! Play calls in any Windows PC. Find calls instantly. Just click on the time and date of your call. Copy, email, encrypt, and transfer calls on any computer. Use your existing network for secure access to important calls.

The universal input connects to telephone lines, handsets, and headsets.

Applicable laws must be observed when recording.
