The Polycom Advantage

- Acoustic Clarity Technology – Allows natural, interactive, two-way conversations (full duplex)
- The first to deliver wideband voice over ordinary telephone lines. It’s so good, you think the person you are talking with is in the same room!
- Industry-leading wireless, allowing you to conference anywhere team collaboration is important. 2.4 GHz WDCT or 1.9 GHz DECT with voice encryption, up to 24 hours of talk time and the ability to dial through a cell phone.
- Easily share content during conference calls or video calls with Polycom QSX™
- Reliable products that are easy to install and use
- Broad product family to meet all your voice conferencing needs – analog to digital to IP, wired to wireless, office to auditorium (see Polycom Vortex® product line at www.polycom.com)

Microphone Coverage

Polycom QSX

The Polycom QSX allows users to instantly share a live view of a computer screen with remote locations over the Web, or with other QSX or VSX™ locations.

Step 1
Dial your Polycom Conference Phone

Step 2
Connect your laptop to the provided VGA cable to display

Step 3
Push one button to share your computer screen with up to 14 other locations

Share content with everyone on the call
- Up to 5 QSX rooms (including the host location)
- Up to 10 Web viewers

SoundStation2W uses a cable that connects to a standard 2.5mm headset connector. If your mobile phone model does not support this type of connection you will need an adapter (not included).

Not all mobile phone models support the SoundStation2W mobile phone connector. Conferences using some mobile phone models may experience diminished audio quality or other functionality. For a list of mobile that are know to work well with the SoundStation2W, please consult www.polycom.com.
### Polycom Voice Conferencing Product Line At-a-Glance
