A Winning Combination:
SoundStation VTX 1000™ and Vortex® EF2280 or Vortex EF2241

Have you ever needed an easier way to control your installed room system? How about deeper, richer, life-like audio quality? With the Polycom Vortex and SoundStation VTX 1000 winning combination, this becomes a reality. No more fumbling over unfamiliar control systems, and no more asking someone to repeat themselves. With a Polycom installed voice and SoundStation VTX 1000 solution, conference calls become more productive and efficient with users experiencing THREE key benefits:

1. Easy control of the Vortex phone-add via the SoundStation VTX 1000 – this includes dialing, volume, and muting. Perfect for everyday users!
2. Experience the revolutionary life-like wideband audio through an installed room system (over a standard PSTN telephone line) for crystal-clear communications emphasizing every word, syllable, and letter – an industry first and one of many benefits of the SoundStation VTX 1000!
3. You can also combine a SoundStation VTX 1000 with a Vortex and a Polycom Video system, and experience an integrated communication solution – all over Wideband audio – another industry first!

The Vortex/SoundStation VTX 1000 combination gives you unparalleled audio quality for voice communications in an installed room system. The SoundStation VTX 1000 with the Vortex EF2280 or EF2241 solution provides you with a simple, familiar user interface to control the installed room system and life-like wideband sound quality - no other company can offer this. It’s an industry first!

Experience the winning combination for yourself - Specially priced product bundles are now available!
