

▶ Polycom® Unified Communication Solution for Microsoft® Office Communications Server 2007

Experience High Definition Voice and Video for the Microsoft Unified Communication Platform.

Polycom Unified Communication Solutions for Office Communications Server 2007 provide a fully unified, intuitive set of collaboration solutions allowing individuals and groups to instantly see, hear and talk with colleagues around the world. The result is improved collaboration, streamlined operations, and faster, more informed decisions.

Polycom and Microsoft Solutions

Polycom offers a full suite of voice, video conferencing and telepresence solutions that interoperate with Office Communications Server 2007, including:

- Polycom immersive telepresence and HDX high definition telepresence solutions, as well as traditional Polycom video conferencing systems
- Polycom CX Series of UC phones including the CX200, CX300 and CX700, designed specifically for Office Communications Server 2007
- Polycom CX5000 Unified Conference Station that adds a unique 360-degree group video experience to Microsoft Office Live Meeting 2007 and Office Communications Server 2007
- Highly scalable and secure conference infrastructure solution, Polycom RMX 2000®, RMX™ 4000, and DMA™ 7000 platforms seamlessly integrate voice and visual communications

Benefits

- ▶ **Unique Collaboration** - Polycom offers the only complete line of integrated voice and visual communications solutions for Microsoft collaboration tools
- ▶ **Simple** – Natural interfaces accelerate user adoption and increase visual communication
- ▶ **Secure** – Advanced Transport Layer Security (TLS) and Secure Real Time Protocol (SRTP) to provide integrated, system-wide authentication and media encryption
- ▶ **Extends High Definition** – Desktop, conference rooms, and remote sites linked in point-to-point/multipoint calls
- ▶ **Fast ROI** – Immediately enhance team collaboration and effectiveness resulting in faster decision making and reduced costs
- ▶ **Leverages Investment** – Add Polycom voice and video to existing Microsoft environments

- Traditional video conferencing systems
 - Polycom VSX®, ViewStation®, and 3rd party devices
- Office and cell phones
- Polycom CX Series of UC phones*
 - *CX 300 requires Microsoft Office Communications Server R2

Improves Collaboration

Polycom room and personal telepresence HDX video endpoints register, authenticate and share presence information with Office Communications Server 2007, making it simple for users to launch video calls by clicking on presence-enabled contacts and see the availability status of Polycom video and telepresence users. Additionally, Polycom's RMX 2000 and RMX 4000 real-time media conferencing platforms interoperate with Office Communications Server 2007, and RMX virtual meeting rooms appear as Office Communicator 2007 contacts. This allows users to launch on-demand voice, video and unified (voice and video) conferences with other standards-based video and voice endpoints with full knowledge that the receiving parties are available. Polycom CX phones, also shown in a buddy list, can be added as voice-only participants.
