

ACS 7.0 new firmware 910

Hot Keypad Dialing

Allows PARTNER ACS ETR telephones to make calls by just dialing the number on the keypad, without having to lift the handset or pressing a speaker button.

(For hot dial pad you need another button with lights programmed with Feature 26)

Message Alert Notification

Allows any PARTNER ACS ETR telephone, programmed with Auto Intercom buttons, to see which users have messages waiting in their mailbox.

(Program a "message alert" Button with lights [feature 27]. When you turn it on it will give message status of any intercom autodials you have programmed on your phone. When you turn it off you get normal usage indication on your phone)

Network Clock Synchronization

The PARTNER ACS R7 will automatically synchronize the system clock with the time sent with the incoming Caller ID information.

Extension Name and Number on the display

Provides a visual display of the programmed extension name and extension number on the display.
