

Jabra

Jabra Product Guide

Professional Headsets for Office and Contact Center

As the global No. 1 headset provider, we have 135 years of telecommunications excellence. In fact, we are continuously launching innovative solutions to the market. By integrating our former GN Netcom products in 2007 we will take this one step further; launching a whole range of cutting edge hands-free wireless connectivity devices for both communication and multimedia.

Jabra combines the best of technology and design to give you innovative tools with excellent sound quality, and great comfort.

Whether it's wireless talking when you're at work, or your favorite hits when you're not; we assure you high-performing products with a quality and design that will empower you to make more out of your life.

Whether it's headsets for a contact center, the office, PC-based IP telephony, mobile or music, we have a solution that helps you to communicate it best. Take a look and see which Jabra solution suits your profile.

CORDED SOLUTIONS

You will experience headset solutions which remain relevant over time. Durability to withstand the rigors of the toughest contact center environments.

Designed to ensure fit and comfort – and to protect hearing. A total expression of the conviction that better sound means better business.

GN2100 SERIES

GN2000 SERIES

Ultralight design. Unsurpassed quality.

- Exclusive lightweight design with titanium-look headband
- Optional true wideband receiver for enhanced sound quality
- Choice of boom arms and microphones for optimum voice quality even in very noisy environments
- Two wearing styles for individual all-day comfort

- USB version available
- Optional new neckband also available for order

Designed to perform. Built to last.

- Optimized for contact center use
- Robust design for day-after-day durability
- Large ear-cushions for extra comfort
- Choice of noise-canceling microphone or SoundTube boom arm
- Wideband sound
- Optional wideband sound
- QD or direct connect
- USB version available

GN8210

GN8000

Great sound quality. Digital acoustic protection.

- The first headset amplifier solution using DSP for reducing noise on incoming calls
- Unsurpassed digital protection against sudden volume peaks
- Automatically keeps incoming volume at user defined level
- Works with virtually any desk phone
- EU Noise-at-work compliance
- QD allows you a choice of call centre headsets.

Enhanced sound. Better acoustic protection.

- The Multi-Purpose Amplifier improves usability and adds safety to your headset
- Wide range of built-in features
- Connects easily to your telephone
- Compatible – suitable for use with almost any type of telephone
- Variant for use with both traditional telephony and PC-based IP telephony (GN8050)
- QD allows you a choice of call center headsets.

GN1200 SERIES

GN1210

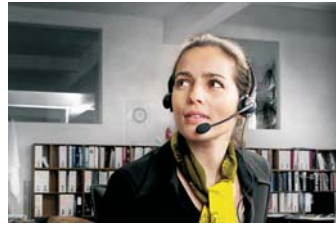

GN1200 / GN1220

Simple connectivity. Greater freedom of choice.

- Works with most desk phones including IP hard phones
- Microphone amplification to boost transmit levels when connecting to low transmit volume phone systems (GN1200)
- Instant connectivity to most carbon-based telephone systems incl. Avaya Callmaster III and IV (GN1210)
- Hassle-free compliance with EU Noise-at-work directive 2003/10/EC (GN1220)
- Standard Quick Disconnect plug to headset

GN8120

GN8110

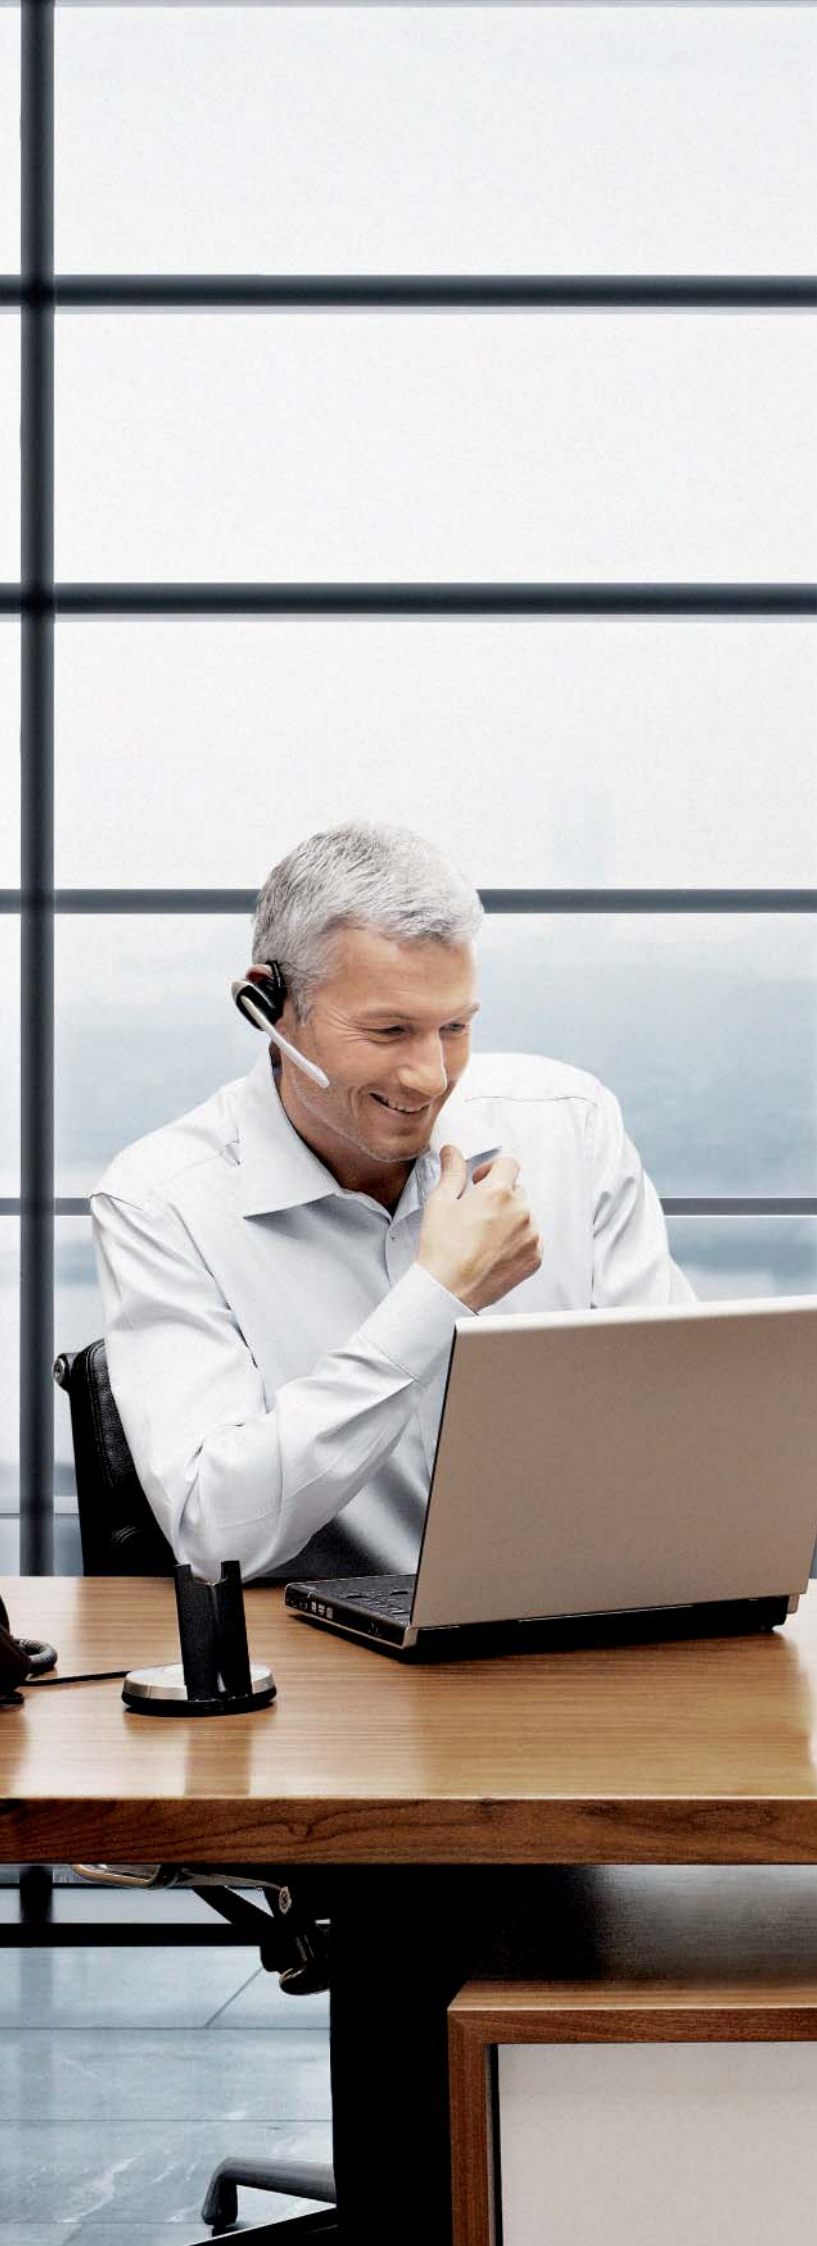

Digital audio quality. Easy-accessible call functions.

- Digital USB-to-headset adapter for superior audio quality
- Enhanced digital audio quality for all softphones
- Fingertip call control buttons and visual LEDs for extreme ease of use
- Connects to any Jabra QD headsets for PC-based IP-telephony
- Designed to work with any IP application
- Digital Signal Processing (DSP)
- Plug & play convenience
- Emergency calling, unrestricted access function

CD quality sound. Plug-and-play installation.

- Connects headset to PC-based voice applications
- Eliminates sound card compatibility problems
- Provides distortion free CDquality sound
- Certified for use on Windows operating systems
- Connects to any Jabra QD headsets for PC-based IP-telephony
- Plug & play with no software to install

OFFICE WIRELESS

Keeping up with the hectic pace of today's workplace means multi-tasking has become a necessary part of the working day. Jabra's range of hands-free and wireless solutions give you an extra helping hand - meaning you can manage tasks more efficiently while communicating at the same time. You'll not only get more done, you'll also feel more comfortable talking while you go about your business.

SEVEN GOOD REASONS TO INVEST IN A WIRELESS HEADSET

Productivity

Experience the freedom and increased efficiency from hands-free communication. With a headset you can continue working productively, while talking with both hands free. Complete multiple tasks quickly and easily, improving the speed of daily work.

Mobility and range

Enjoy freedom of movement with our wireless headsets offering an unparalleled office range of up to 150 meters. Untie yourself from the limitations of traditional office telephones. Create a more efficient workspace where you can talk and still walk around effortlessly gathering information.

Sound clarity

Experience consistently superior call sound clarity with Jabra headsets that incorporate the finest in acoustic technology. All headsets feature PeakStop™ technology. Combined with noise-canceling microphones this ensures that you hear and are heard clearly.

Talk time

All Jabra wireless headsets provide day-long talk time with the headset charging in the base between calls. All models in the GN9300 Series offer interchangeable batteries as an accessory, which enable unlimited talk time, keeping you connected around the clock.

Comfort

Headsets with carefully adjusted acoustics, lightweight structures and ergonomic design plus a selection of wearing styles to match the needs of any user make it easier and more comfortable to make and take calls at work. A headset provides comfort and helps to avoid aching muscles and neck strain from cradling the telephone handset between head and shoulder.

Security

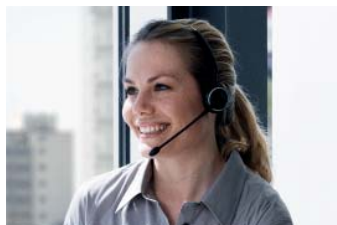

All Jabra wireless office headsets digitally encrypt the signal between headset and base. This guarantees conversation confidentiality where you can talk freely, confident that the only people listening in are the ones you're talking to.

Conference calls

The Jabra GN9350 and the GN9120 offer the optimal solution for conference calling. Up to four people can take part in a wireless conference call by docking their headsets in the base of the caller, and continue to talk with clarity from anywhere in the office environment.

GN9350

GN9330

OPTIMIZED FOR
Microsoft®

MULTIUSE

Jabra Multiuse is a new range of Bluetooth headsets from GN that can switch seamlessly between mobile phones, desk phones and PC softphones. Before Jabra Multiuse, you needed separate headsets for separate phones. Now you can simplify your work life.

Because Jabra Multiuse headset does not care what device you use to make or answer calls. It will switch effortlessly between any two of your own choice.
