- Ideal for the first time office user
- Users that are using mobile headsets, but no office headset
- The “Light Office User” – 1 to 4 hours per day spent on the phone
- Users that desire the benefits of hands-free working
- Wired headset users that want the flexibility and convenience wireless delivers
- Managers that want their employees to be more productive and increase their well being

Target Applications

- Office personnel
- Management
- Small Office / Home Office
- Receptionists

Starting the Conversation

- Do you often need to move around during a call and find you are often constrained by your telephone cord?
- Do you like the idea of one headset connected to both your desk phone and

mobile at the same time?

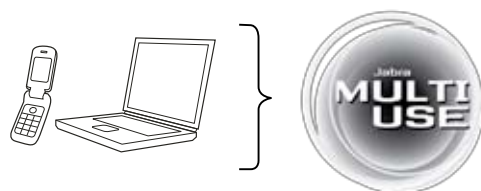

- Would you like to hear how you can turn your telephone handset into a headset and experience all-day comfort?
- What if you could take calls up to 30 feet away from your desk and never miss another call – does that interest you?
- If I may introduce you to the new Jabra T5330 wireless headset – the newest headset from Jabra

Accessories

- GN 1000 Remote Handset Lifter
 - Maximise communications convenience
 - Answer and end calls while away from your desk
 - Compatible with our wireless office headset systems
- Neckband

Did you know?

- What is DSP (Digital Signal Processing)? A digital processor enhances the incoming voice/audio signal and removes sound impurities from noisy environments, mobile phones, etc.
- The market potential is HUGE! Globally, there are 442 million office workers.
- Headset penetration in the office space is believed to be less than 6% in 2005 (increasing to 28% in 2010).
