

EU24BL Key Feature Expansion Unit (700345275)

Features:

The EU24BL is an add-on unit that works in association with a 4620, 4620SW, 5620 and 5620SW. The EU24BL provides an additional 24 programmable buttons with associated display label and status icons. Only one EU24BL per phone. The EU24BL provides a backlit display. Although the EU24BL Expansion Module supports an additional 24 Call Appearance/Feature buttons, it displays only the button labels for one column of 12 buttons at a time. A dotted line separates the left column from the right column. When you view the labels and icons for the left column, the icons for any active or selected right column features display to the right of the dotted line. To view the column not currently displayed, press the Alternate Display button. You can alternately press any Call Appearance/Feature button on the column not currently displayed. Doing so displays that column and selects the line/feature associated with the button you pressed.

Each IP Office DS module, including control units with integrated DS ports, supports a maximum of eight EU24 or eight EU24BL or two XM24 or two 4450 units only. If using an EU24BL with only IP telephones the IP Office will support up to 8 EU24BL modules per IP Office switch.

Note: The EU24BL does NOT work with either the 5420 or 2420.

- ✓24 Programmable call appearance/feature keys.
- ✓Automatically labeled from the system (no paper labels).
- ✓Connects directly to the associated phone.
- ✓Requires a 1151B1 or 1151B2 power supply unit for the phone including for IP phones using Power over Ethernet (PoE).
