

IP Soft Phone License IP400 IPPRO RFA 5 (174463)

IP Phone Manager Soft Phone RFA 5 **adds an additional 5** iPhoneManager Soft Phone users.

The Avaya iPhoneManager IP Soft phone allows you to easily make and receive calls by Voice-Over-IP (VoIP), from any location, using a simple graphical user interface on your PC or laptop computer screen.

The iPhoneManager IP Soft phone by Avaya is an IP telephone client for Windows-based PCs for use on the Avaya IP Office. It provides transparent access to real time voice communications and productivity enhancing Avaya Phone Manager Pro features such as managing multiple call appearances, transfer and conference. Avaya IP Soft phone iPhoneManager offers simple point and click dialing from Microsoft Outlook contact lists, phone numbers displayed within Internet Explorer pages and LDAP-based directories. Incoming calls can be synchronized with directory look-ups for simple screen pop applications. Instant messaging and presence tracking help iPhoneManager IP Soft phone users become aware of each other's current availability and to communicate appropriately via a phone call or instant message.

The iPhoneManager RFA for the Avaya IP Office is a license that is loaded into the Avaya IP Office system. **The Avaya IP Office Phone Manager Pro RFA is required for the iPhoneManager to work.**
