

Lucent Transtalk 9040 Handset Cordless Phone (3204-09B/108535998) (2001)

TransTalk 9040 Digital Wireless handset can access up to 10 lines, has a 4 line back-lit display, has standard Hold, Transfer, Conference, Mute, Intercom and Redial buttons. 3.5 hours of talk time and 22 hours standby time with standard battery. 900 ft mobility range from base unit.

Message waiting indicator and silent vibrating ring. Built in jack for headset. Includes wireless handset, desktop charger (quick battery charge, full charge takes 1.5 hours), standard battery and belt clip.

Requires TransTalk 9040 Dual Radio Module for use.

Lucent Transtalk Dual Radio Module for Magix/IP office/Definity Systems (3204-DRD)

TransTalk 9040 Dual Radio Module for use with the TransTalk 9040 Wireless handset. For use in the Magix, IP office and Definity environments. This module can support up to two wireless handsets. It is compatible with single and dual zone configurations. Allows linked configuration for connecting more than one radio module to a single station port. The new module eliminates the need for the Carrier Assembly units that were required on the TransTalk 9031 phones. The modules are now line powered, eliminating the need for a separate, local AC power supply. The modules can be self-standing or wall mounted on a standard mounting bracket.
