

## Merlin Magix Expansion Carrier w/ Power Supply (61890/108588567)

A second or third carrier that consists of a backplane, cabinet, cover, 491D1 power supply, and mounting brackets

Expands the Merlin Magix Basic Carrier by adding 6 universal module slots for line and station modules

Can be connected to a plastic carrier that is upgraded from a Merlin Legend to Merlin Magix Release 2.0 system for the purpose of installing an Integrated Network Access Module

Allows off-site staging, so the system hardware assembly and associated programming can be completed prior to installing the system on site

Improves protection for electromagnetic interference (EMI) and radio frequency interference (RFI), and will accommodate future convergence applications
